DECORATIVE GRAVE FLAGS SOL RFQ 786-33-97 DUE 031497 POC
Wanza Lewis, 703/441-3072, Contracting Officer This is a combined synopsis/solicitation for commercial items prepared in accordance with the format in the Federal Acquisition Regulation (FAR), Subpart 12.6, as supplemented with additional information included in this notice. This announcement constitutes the only solicitation; quotations are being requested and a written solicitation will not be issued. RFQ 786-33-97 is hereby issued as a Request for Quotation and includes incorporated provisions and clauses in effect through Federal Acquisition Circular 90-45. The Standard Industrial Code (SIC) is 2399 with a small business size standard of 500 employees. The Department of Veterans Affairs (VA) National Cemetery System has a requirement for 86,406 decorative Americans flags for graves at select cemeteries for final delivery by May 15, 1997. The contractor shall provide and deliver to each delivery point listed below, an 8 inches by 12 inches finished sized American flag mounted on a 3/8 inch by 24 inches wood dowel. The wood dowel shall be pointedon the bottom end with a gilt-gold wood or plastic spear securely fastened to the top. The flag shall be hemmed on all sides, cotton fabric, and will be stapled to the staff with at least three (3) staples (top, center, bottom). All flags shall be delivered f.o.b. destination to each of the national cemeteries listed below. Flags are to be delivered to the individual delivery points as soon as production is completed to meet the **specified** delivery **dates** . Partial **orders** will be **accepted** when agreed upon by the contracting officer. Contract Line Item Number (CLIN) 0001: Bath National Cemetery, San Juan Ave., Bldg. 1301, Bath, NY 14810, Quantity 3,500 ea. CLIN 0002: Beverly National Cemetery, RD#1, Bridgeboro Rd., Beverly, NJ 08010, Quantity 3,000 ea. CLIN 0003: Calverton National Cemetery, 210 Princeton Blvd., Calverton, NY 11933, Quantity 15,280 ea. CLIN 0004: Camp Butler National Cemetery, 5063 Camp Butler Rd., RR#1, Springfield, IL 62707, Quantity 500 ea. CLIN 0005: Culpeper National Cemetery, 305 U.S. Ave., Culpeper, VA 22701, Quantity 7,000 ea. CLIN 0006: Ft. Custer National Cemetery, 15501 Dickman Rd., Augusta, MI 49012, Quantity 2,000 ea. CLIN 0007: Long Island National Cemetery, 2040 Wellwood Ave., Farmingdale, NY 11735, Quantity 20,000 ea. CLIN 0008: Marion National Cemetery, VA Medical Center, 1700 East 38th St., Marion, IN 46952, Quantity 1,000 ea. Hanover Direct Subsiadary, Keystone Internet Services Signs Multi-Year Agreement With Camdens, Inc.

WEEHAWKEN, NJ – June 27, 2000 – Hanover Direct, Inc. (AMEX: HNV) announced today that Camdens, Inc. (http://www.camdens.com) has entered into a contractual agreement with Keystone Internet Services, the Company's e-commerce services provider. Keystone will provide merchandise fulfillment services for Camdens, the leading business-to-business Company delivering end-to-end executive gift, reward, recognition and incentive solutions.

Under the terms of the agreement, Keystone will provide merchandise fulfillment services including receiving and warehousing of product; picking, packing, processing and shipping; and special processing/handling programs. Camdens will become a premier tenant in Keystone's 700,000 square-foot state-of-the-art warehouse facility in Maumelle, Arkansas.

In addition to providing distinctive, often customized merchandise, Camdens offers online gift giving program administration tools as well as highly personalized account management services. Additional services include email notification and delivery as well as Recipient's Choice™ technology, a feature pioneered by Camdens which enables Recipients to select a gift from a virtual gift basket created by the Sender.

"The addition of Camdens to Keystone's client roster demonstrates our ability to deliver the 'white-glove' fulfillment services expected by the corporate customer," stated Rakesh K. Kaul, President and Chief Executive Officer of Hanover Direct, Inc. "We look forward to extending our core fulfillment competencies in the consumer market into the business-to-business space," added Frank DiMaria, President of Keystone Internet Services.

Fred Reffsin, Camdens CEO, stated; "Keystone's expertise in handling high end merchandise as well as their ability to provide the necessary high-touch services for our customers made them the logical choice as our fulfillment partner. In addition, they will provide our business additional flexibility, scalability, reliability and service."

Keystone provides full service solutions to both online and offline organizations. On the 'front-end' Keystone delivers logistical services required by e-commerce companies such as telemarketing, order processing, credit card transaction processing, customer database management and systems programming and interface support. On the 'back-end' it offers a comprehensive range of services including fulfillment, order management, inventory management, and facility management. Through its association with the Hanover Direct portfolio of catalogs and associated web sites, as well as a growing roster of third-party clients, Keystone has obtained expertise in a broad range of product categories such as home fashions, home improvements, men's and women's apparel, and gifts. In addition to Camdens, its customer list includes: eZiba.com, Oxygen Media, Fogdog Sports, The National Geographic Society, United Retail Group, Mercata.com, KBkids.com and The Dress Barn, Inc.

About Hanover Direct, Inc.
Hanover Direct, Inc. (AMEX: HNV) and its business units provide quality, branded merchandise through a portfolio of catalogs and e-commerce platforms to consumers, as well as a comprehensive range of Internet, e-commerce, and fulfillment services to businesses. Hanover Brands, Inc. is comprised of the Company's catalog and e-commerce web site portfolio of home fashions, apparel, general merchandise and gift brands, including *Domestications, The Company Store, Turiya, Domestications Kitchen & Garden, Kitchen & Home, Encore, Improvements, Silhouettes International Male, Undergear, and Gump's By Mail*. Hanover Direct is the exclusive distributor of the *Compagnie* de la Chine brand in North America; the Company owns *Gump's*, a retail store based in San Francisco; and the Company has a majority equity stake in *Always In Style*®. Each brand can be accessed on the Internet individually by name. erizon, Inc. is comprised of Keystone Internet Services, Inc. (www.keystoneinternet.com), the Company's third party, end-to-end, fulfillment, logistics and e-care provider, and Desius, LLC, the Company's joint venture with RS Software India, Ltd., offering 24/7-web shop services and e-commerce systems development. The erizon subsidiary also services the logistical, IT and fulfillment needs of the Hanover Brands subsidiary. Information on Hanover Direct, including each of its subsidiaries, can be accessed on the Internet at www.hanoverdirect.com.

About Camdens, Inc.
Camdens is the leading e-commerce and services company delivering end-to-end executive gift, reward, recognition and incentive solutions to Fortune 5000 companies. The Company combines a business-to-business focus and innovative technology with a strong commitment to outstanding merchandise and customer service. The result is a highly customized, efficient and scalable enterprise solution that enables corporations to manage and control all of their corporate gifting through a single point of contact. In addition to simplifying and unifying corporate gift procurement, Camdens gives corporate customers a multitude of back end reporting features that help deliver discipline and control to the corporate gift process.

Camdens launched its service in September 1999. The company is headquartered in White Plains, NY.

...SPECIFICATION even a single recipient to receive multiple copies of a given mail item. Further, a recipient may make and distribute copies of a mail item. The circulation list does not define and control the sequential delivery of a single copy of a mail item . Although the inter mediate mailbox will distribute the copies according to the order of the recipients named in the distribution list, this is merely a matter of...

...no control, since the rights of the recipients with regard to any mail item are associated with the recipients themselves. The recipients are not requested to take a defined action before delivery of a mail item to a next recipient .

The claimed invention discloses a particular application in an apparatus for distributing the processing of data across a plurality of loci of...a regular mail item. It is the addressing function that is different for a route package .

From main menu screen 23 of Figure 2 the user may choose to send a memo (a single item of mail) or a **package** (a collection of **items**) as a route **package** . Figure 7 shows the **Package** screen 35 which is displayed to the user upon his selection from main menu screen 23 of Figure 2 to send a **package** . **Package** screen 35 provides the user **with** the functions for **creating** a **package** . In particular, the user positions the cursor and **presses** the Return key to select types of items at the current cursor **position** for the contents of the package. Items such as a certain file, or document may be **selected** by name. The specified types of items are listed on a central portion of screen...

...immediate), security (general, limited, confidential), and type of mail (action, information, reference). The user may **also** change the name of the author of this mail by using Function key 9 . The electronic mail system will automatically provide the originator with a confirmation of **delivery** of the **package** for each **recipient** if the " **Delivery** Confirmation" field has an "X" placed next to "Yes". If the user places an "X...of the recipient at the time of voting.
Also note in Figure 17 that the **selection** or choices of votes which is displayed for each **recipient** is established **by** the originator during the formation of the route **package** . After the password and vote are entered, pressing the **Return** key removes the route **package** from the current recipients mailbox (Lee Tru) and **sends** it along to the next **recipient** 's mailbox (Jane Hans) throughout electronic mail. If "No Decision Required" is the **voting** option, Voting screen 55 is not displayed and the route **package** is sent along to the next **recipient** .
After sending the route **package** to the **next** **recipient** , the sending **recipient** is returned to the Mailbox screen 47 of Figure 13. If the sending recipient is...

...the return key from screen 55 will convert the route package into a completed route **package** (Comp Rte) and will return the recipient to the Mailbox screen 47 of Figure 13...18. This screen lists the confirmations of various mail items sent by the originator. The **name** , content, date and time initially sent, **delivery** status, and certify/acknowledge **status** of each mail **item** requesting a confirmation is listed on screen 57. **Route** **packages** are designated as "Rte Pkg" in the **content** filed of screen 57. The **delivery** status filed for a **route** **package** may have one **of** two values. A value of "Active" means the route **package** is still in the process of being serially circulated to the recipients on the route list. A **delivery** status of "All" indicates that the route **package** has completed the circulation cycle specified **on** the route list. Screen 57 allows the user to individually view each of the listed...

...shown in Figure 19. Confirmation Detail screen 59 shows the various recipients who have confirmed **the** receipt of the route **package** **currently** positioned by the cursor. Confirmation Detail screen 59 lists the location, **delivery** date and **time** to each **recipient** , and date and time of certification from each listed addressee/ **recipient** .
Function key 10 of Confirmation Detail screen 59 enables the use to view Route Detail...22 in a Major Information database (MINFO) 81. Each time a user creates a route **package** through the **interactive** program described **in** Figures 7- 12 , a Route Definition file 73 of Figure 23 is formed in MINFO 81. The **recipient** records 77 of the Route Definition file 73 and their order are defined by the...

...recipients, and the list of to-be sent files 95 to a temporary buffer (TBUFF) 93 . If **delivery** **confirmation** was **selected** for the **package** in Figure 8, the subroutine 91 also establishes a **confirmation** **record** 93 in MINFO 81. The **key** or address of this confirmation record 93 is saved in header record 75 of...

If the single selection indicates financial credit, then the...

...155). However, the server would continue by accessing a database for infonnation about the pre- **selected** gift and sending the information as a pre- **selected** gift Web page to the **Recipient** computer(158). TheservercontinuesbyreceivingaRecipientselectionWebpagefrom the **Recipient** computer with a first **Recipient** selection (160). The server continues by causing the pre- **selected** **gift** to be provided to the **Recipient** if the first **Recipient** selection indicates **delivery** of the pre- **selected** **gift** (1 62). The server may continue by causing a financial credit to be provide to the Recipient if the first **Recipient** selection indicates a financial credit (163). The server continues by accessing a database for information about different gifts if the first Recipient selection requests information about the different **gifts** (164). The server continues by sending the infonnation about the different **gifts** to the **Recipient** computer if the first **Recipient** selection requests information about different gifts (166). TheservercontinuesbyreceivingasecondRecipientselectionfromthe **Recipient** computer (1 68). The server may conclude by causing the different **gift** to be provided to the **Recipient** if the second **Recipient** selection indicates delivery of the different **gift** (1 70). The server may conclude by causing the pre-selected **gift** to be provided to the **Recipient** if the second **Recipient** selection indicates **delivery** of the preselected gift (1. 72). The server may conciude by causing a financial credit to be provided to the **Recipient** if the second Recipient selection indicates credit (174).

Addltlonal executable operations may be included in...the Giver 102 browses the Merchant's 104 goods and/or services and selects a **gift** (the "pre- **selected** **gift** ") for the **Recipient** 106. The Giver 102 also provides the **Recipient** 's email address, **delivery** address, lf avallable, and a method of payment.

Altematively, in addition to pre- **selecting** a **gift** for the **Recipient** 106, the Giver 102 may **select** an inclusive or exclusive category or categories of altemate gifts. In another altemate embodiment, in...

...s Web site or another participating site.
Finally, the Merchant 104 obtains or confiriris the **Recipient** ' s desired
delivery address and dispatches the **selected** **gift** , or possibly

credit confirmation, to the **Recipient** 106.

THE MERCHANT/GIVER INTERACTION
A more detailed schematic of the gift-giving system will...

...that the Merchant may be able to contact the Giver to confirm the order, purchase, **delivery** , and the 1ike. Preferably, the 1 5 **gift** catalog web page will also allow the Giver to create a personalized email greeting card for **delivery** to the **Recipient** at the time the **Recipient** is notified of the pre- **selected** gifi.

The Giver/merchant interaction may proceed differently in other embodiments of the present gift...communication embodiment. Similarly, the server may also cause the Giver to be notified that the **Recipient** has **selected** a **gift** and that the **gift** has been shipped. Preferably, the email sent to the Giver would not indicate whether the **Recipient** **selected** the pre- **selected** **gift** , a different **gift** , or financial credit.
The **Recipient** and Giver notifications may occur simultaneously with the time of **gift** or credit selection, at the time of **gift** **shipment** , after **shipment** , after **delivery** , or at any combination thereof For example, one email message may be sent to the...Altematively, the Giver or his or her designee may recelve the financial credit, should the **Recipient** refuse all of his or her gift options.

1f the Recipient chooses not to browse the altemate **gifts** , the Recipient can accept the pre-selected **gift** (318). In this case, the Recipient will select the pre-selected **gift** as described above (3 1 8) and confirm or provide the Recipient's delivery address (320). Then, the pre-selected **gift** will be dispatched (322) and the parties notified of the **shipment** and/or delivery (322, 324).

1f the Recipient does choose to browse the Giver's altemate gift suggestions (314, 330), the Recipient will make a second **Recipient** selection to receive either the pre-selected **gift** , an altemate **gift** , or financial credit. 1f, afier browsing the predetermined alternate **gift** suggestions, the **Recipient** chooses to reccive the pre-selected
'f
g1 t (332), then the **gift** giving and receiving system will proceed as indicated above by selecting the pre-selected gift (318) and confirming or inputting his or her **delivery** address (320). The pre-selected **gift** will then be delivered (322) and the Giver and Receiver notified (322, 324) as discussed above.

27
However, after browsing the altemate gifts (330), the Recipient may opt not to **select** the pre-selected gift. In this scenario, the Recipient must detennine whether to accept one...giving and receiving system continues in a similar
28
fashion as discussed above. Specifically, the **Recipient** will confirm his or her delivery address (320), and the altemate **gift** will be shipped to the **Recipient** (322) and the parties notified of **shipment** and/or **delivery** (322, 323).

If after browsing the alternate **gifts** , the **Recipient** chooses not to accept elther the pre- **selected** **gift** (332) or any of the altemate glfts (334), the **Recipient** can deny the gifts as discussed above (326). The Web site may have an interface...

Claim
... in a Merchant server computer connected over a network to a Giver computer and a **Recipient** computer comprising:
recciving a selection from the Giver computer of a pre-selected gift;
providing infonnation about said pre-selected **gift** to the Recipient computer;
receiving a first Recipient selection from the Recipient computer;
causing said pre-selected **gift** to be provided to the Recipient if said first Recipient
selection indicates delivery of said pre-selected **gift** ;
accessing a database for information about a different **gift** if said first Recipient

selection requests said infonnation about sald different **gift** ;
sending said information about said different **gift** to the Recipient
computer if said first Recipient selection requests said infonnation
about said different **gift** ;
receiving a second Recipient selection from the Recipient computer;
causing said pre-selected **gift** to be provided to said **Recipient** if
said second
Recipient selection indicates delivery of said pre-selected **gift** ; and
causing a chosen different **gift** to be provided to sald **Recipient** if
said second **Recipient** selection indicates **delivery** of said chosen
different **gift** .

2 The method of claim 1 additionally comprising:
causing a credit to be provided to...

...said items.

14 The method of claim 1 additionally compriising:
receiving a request from the **Recipient** computer for information about
said pre
selected gifi;
accessing a database for inforination about said pre- **selected** **gift** -,

15 The method of clalm 4, wherein said pre- **selected** **gift** has a first
pnice, and said chosen different **gift** has a second price, the inethod
additionally comprising: receiving a **Recipient** payment lf sald second
Recipient selection indicates **delivery** of said chosen different **gift**
and said second price is greater than said first price, said **Recipient**
payment being the difference between said second price and said first
price; and
providing said...
...in a Merchant server computer connected over a network to a Giver
computer and a **Recipient** computer comprising:
receiving a Giver selection from the Giver computer of a pre- **selected**
gift ; sending infortriation about said pre- **selected** **gift** to the
Recipient computer;
receiving a **Recipient** selection from the **Recipient** computer;
causing said pre- selected **gift** to be provided to the **Recipient** if
said **Recipient**
selection indicates **delivery** of said pre- **selected** gift ; and
causing a credit to be provided to said **Recipient** if said **Recipient**
selection indicates sald credit.
32
. A method in a Merchant server computer connected over a network to a
Giver
computer and a **Recipient** computer comprising:
receiving a Giver selection from the Giver computer of a pre-selected
gift; sending infon-nation about said pre-selected **gift** and a different
gift to the
Recipient computer;
receiving a **Recipient** selection from the **Recipient** computer;
causing said pre-selected **gift** to be provided to the **Recipient** if
said **Recipient**
selection indicates delivery of said pre-selected **gift** ;
causing a chosen different **gift** to be provided to said **Recipient** if
sald **Recipient**
0 selection indicates **delivery** of said chosen different **gift** ; and
causing a credit to be provided to sald **Recipient** if said **Recipient**
selection indicates credit.

18 A method of giving and receiving gifts over a computer network
comprising: receiving a Giver selection' for a pre- **selected** gift from a
Giver computer over said
computer network;
notifyIng a Recipient that said pre- **selected** gift has been **selected**
for said
Recipient ;
receiving a **delivery** address over said computer network;
receiving a **Recipient** selection from a **Recipient** computer over said
computer
network;
causing sald pre- selected **gift** to be delivered to said address if

said **Recipient**
selection indicates delivery of said pre- **selected** **gift** ; and
causing a chosen different **gift** to be delivered to said address lf sald
Recipient selection indicates **delivery** of said chosen different **gift**
.

19 The method of ...33
. The method of claim 19 wherein said notifying comprises an email
communication to said **Recipient** computer.

21 The method of claim 20, wherein sald pre- **selected** **gift** has a first
price, and sald
different **gift** has a second price, the method additionally comprising:
receiving a **Recipient** payment lf said **Recipient** selection indicates
delivery of sald different **gift** and said second pnice is greater than
said first price, said **Recipient** payment
being the difference between said second price and said first price; and
providing said...

...device, sald processor configured to:
receive a selection from a Giver computer of a pre- **selected** **gift** ;
provide information about said pre- **selected** **gift** to a **Recipient**
computer;
receive a first **Recipient** selection from said **Recipient** computer;
cause said pre- **selected** **gift** to be provided to the **Recipient** if
said first **Recipient**
selection indicates **delivery** of said pre- **selected** **gift** ;
access a database for infon-nation about a different **gift** if said first
Recipient
selection requests said infonnation about said different gift;
send said information about said different glft to the **Recipient**
computer lf said first **Recipient** selection requests said information
about said different **gift** ;
receive a second **Recipient** selection from said **Recipient** computer;
cause said pre- **selected** **gift** to be provided to said **Recipient** lf
said second
Recipient selection indicates delivery of said pre- **selected** **gift** ;
and
cause a chosen different **gift** to be provided to sald **Recipient** if
said second **Recipient** selection indicates **delivery** of said chosen
different **gift** .
34
. The system of claim 22 wherein said processor is addltionally
configured to: cause a...

...of claim 22 wherein said processor is additionally configured to:
receive a request from said **Recipient** computer for infonnation about
said pre
selected **gift** ; and
1 5 access a database for inforrnation about said pre- **selected** **gift** .

27 The system of claim 25, wherein said pre- **selected** **gift** has a first
price, and said chosen different **gift** has a second price, the system
additionally configured to: receive a **Recipient** payment if said second
Recipient selection indicates **delivery** of said chosen different **gift**
and said second price is greater than sald first price, said **Recipient**
payment being the difference between said second pnice and said first
price;
and
provide said...

...said processor configured to:
receive a Giver selection from a Giver computer of a pre- **selected** **gift**
;
send infonnation about said pre- **selected** **gift** to a **Recipient**
computer;
receive a **Recipient** selection from said **Recipient** computer;
cause said pre- selected **gift** to be provided to the **Recipient** if
said **Recipient**
selection indicates **delivery** of said pre- selected **gift** ; and
cause a credit to be provided to said **Recipient** if said **Recipient**
selection indicates said credit.

38 A system for giving and receiving gifts comprising a memory...

...configured to:
1 5 receive a Giver selection from a Giver computer of a pre- **selected**
gift; send information about said pre-selected **gift** and a different
gift to a **Recipient**
computer;
receive a **Recipient** selection fTom said **Recipient** computer;
cause said pre-selected **gift** to be provided to the **Recipient** if sald
Recipient
selection indicates delivery of said pre-selected **gift** ;
cause a chosen different **gift** to be provided to said **Recipient** if
said **Recipient**
selection indicates **delivery** of said chosen different **gift** ; and
cause a credit to be provided to said **Recipient** if said **Recipient**
selection indicates credit.

39 A system for giving and receiving gifts comprising a memory device...
...to said mernory device, said processor configured to:
receive a Giver selection for a pre- **selected** gift from a Giver computer
over a
computer network;
37
notify a Recipient that said pre- **selected** **gift** has been **selected**
for said **Recipient** ;
reccive a **delivery** address over said computer network;
receive a **Recipient** selection from a **Recipient** computer over said
computer
network;
cause sald pre- **selected** **gift** to be delivered to said address if said
Recipient
selection indicates delivery of sald pre- **selected** **gift** ; and
cause a chosen different **gift** to be delivered to said address lf sald
Recipient selection indicates **delivery** of said chosen different **gift**

40 The system of claim 39 additionally configured to:
0 cause a credit to be...

...41 The system of clalm 40 wherein said notifying comprises an email
conimunication to said **Recipient** computer.

42 The system of clalm 41 wherein said pre- **selected** **gift** has a first
price, and said 5 different **gift** has a second price, the system
addltlonally configured to: receive a **Recipient** payinent if said
Recipient selection indicates **delivery** of sald different **gift** and
sald second price is greater than said first price, said **Recipient**
payment
being the difference between sald second price and said first price; and
provide said...

...receiving gifts comprising:
means for receiving a selection from a Giver computer of a pre- **selected**
gift; means for providing infonnation about said pre-selected gift to a
Recipient
computer;
means...

...provided to the Recipient if said first
Recipient selection indicates delivery of said pre-selected **gift** ;
means for accessing a database for inforination about a different **gift**
if said first
Recipient selection requests said information about said different **gift**
;
1 0 means for sending said infonnation about sald different **gift** to the
Recipient
lf sald first Recipient selection requests s 1
computer aid infonnafion about said different
gift ;
means for recciving a second **Recipient** selection from said **Recipient**
computer; means for causing said pre-selected **gift** to be provided to

sald **Recipient** if said 1 5 second **Recipient** selection indicates
delivery of said pre-selected **gift** ; and means for causing a chosen
different **gift** to be provided to said **Recipient** if said second
Recipient selection indicates **delivery** of said chosen different **gift**
.

44 The system of claim 43 additionally comprising:
means for causing a credit to be...altemate glfts and sald items.

57 The system of claim 55 wherein said chosen different **gift** is
selected from the group comprising offered goods or services other than
said one or...
...comprising:
means for recelving a Giver selection from a Giver computer of a
pre-selected
gift ;
means for sending information about said pre-selected **gift** and a
different **gift** to a
Recipient computer;
means for recciving a **Recipient** selection from said **Recipient**
computer;
means for causing said pre-selected **gift** to be provided to the
Recipient lf said
Recipient selection indicates delivery of said pre-selected **gift** ;
means for causing a chosen different **gift** to be provided to sald
Recipient if said **Recipient** selection indicates **delivery** of said
chosen different **gift** ; and means for causing a credit to be provided to
sald **Recipient** if said **Recipient** selection indicates credit.

·60 A system for giving and recelving gifts comprising:
means for recciving a Giver selection for a pre- **selected** glft from a
Giver
computer over a computer network;
means for notifyIng a Recipient that said pre- **selected** **gift** has been
selected for
said **Recipient** ;
means for receiving a **delivery** address over sald computer network;
means for receiving a **Recipient** selection fTom a **Recipient** computer
over said
computer network;
means for causing said pre- **selected** **gift** to be delivered to sald
address if said
Recipient selection indicates delivery of said pre- **selected** **gift** ;
and
means for causing a chosen different **gift** to be delivered to sald
address if said **Recipient** selection indicates **delivery** of said chosen
different **gift** .
42
. The system. of clalm 60 additionally comprising:
means for causing a credit to be...

...of clalm 61 wherein said means for notifyin.g comprises an email
communication to said **Recipient** computer.

63 The system of claim 62 wherein said pre- **selected** **gift** has a first
price, and sald
different **gift** has a second price, the system additionally comprising:
means for receiving a **Recipient** payment lf sald **Recipient** selection
indicates **delivery** of said different **gift** and said second price is
greater than said first price, said **Recipient** payment being the
difference between said second price and sald first price;
and
means for...

...selected gift;
prograni means in said computer readable medium. for sending infonriation
about
said pre- **selected** gift to the Recipient computer;
program means in said computer readable medium for recciving a **Recipient**

selection from the **Recipient** computer;
prograrri means in sald computer readable mediuni for causing sald pre-

selected **gift** to be provided to the **Recipient** if said **Recipient** selection indicates **delivery** of said
pre- selected **gift** ; and
43
program means in said computer readable medium for causing a credit to be ...

...1 5 program means in said computer readable medium for sending information about said pre- **selected** gift and sald different gift to the Recipient computer;
program means in said computer readable medium for receiving a **Recipient**

selection from the **Recipient** computer;
program means in sald computer readable medium for causing said pre- **selected** **gift** to be provided to the **Recipient** if said **Recipient** selection indicates delivery of said
pre- selected **gift** ; and
program means in said computer readable medium for causing said different **gift** to be provided to the **Recipient** lf sald **Recipient** selection indicates **delivery** of said different **gift** .

67 A server memory for storing data for access by an application program being executed...

...data processing system for receiving a Giver selection from a Giver computer of a pre- **selected** **gift** and causing said pre- **selected** **gift** to be provided to a **Recipient** if a **Recipient** selection indicates **delivery** of said pre- **selected** gifi, comprising: a data structure stored in sald memory, said data structure including information
44...data processing system for recciving a Giver selection from a Giver computer of a pre- **selected** **gift** and causing sald pre- **selected** **gift** to be provided to a **Recipient** if a **Recipient** selection indicates **delivery** of said pre- **selected** **gift** , comprising: a data structure stored in said memory, sald data structure including information used by...

...data processing system for receiving a Giver selection from a Giver computer of a pre- **selected** **gift** and causing said pre- **selected** **gift** to be provided to a **Recipient** if a **Recipient** selection indicates **delivery** of said pre- **selected** **gift** , comprising: a data structure stored in said memory, said data structure including information used by...

...Intemet-based system for receiving a Giver selection from a Giver computer of a pre- **selected** **gift** and causing said pre- **selected** **gift** to be provided to a Reciplent if a **Recipient** selection indicates **delivery** of said pre- **selected** **gift** , comprising: a server computer hosting **gift** giving service accessible via client computers to a plurality of users making inquiries to the...

...or said credit to
1 5 be provided to said Recipient;
whereby either sald pre- **selected** gift or the credit is caused to be provided to said Recipient in response to said **Recipient** selection.

71 An Intemet-based system for recciving a Giver selection from a Giver computer of a pre- **selected** **gift** and causing said pre- **selected** **gift** to be provided to a **Recipient** if a **Recipient** selection indicates **delivery** of said pre- **selected** **gift** , comprising: a server computer hosting **gift** giving service accessible via client computers to a plurality of users making inquiries to the...

...or sald different
gift to be provided to said Recipient;
46
whereby either said pre- **selected** gift or said different gift is caused to be provided to said Recipient in response to said **Recipient** selection.

72 An Intemet-based system for recelving a Giver selection from a Giver computer of a pre- **selected** **gift** and causing sald pre- **selected** **gift** to be provided to a **Recipient** if a **Recipient** selection indicates **delivery** of said pre- **selected** **gift** , comprising: a server computer

hosting gift giving service accessible via client computers to a plurality of users making inquiries to the...

Detailed Description
Claims

Detailed Description
... of security or which result in excessive cost to the policy authority. Post delivery attributes specify actions a **recipient** can take with respect to the received **package** including replying to the sender of the **package** , replying to the sender of the **package** at the expense of the sender, forwarding the **package** to one or more other recipients, saving the **package** to local persistent storage, and printing the contents of the **package** . Each post **delivery** attribute can involve a security risk and/or extra cost to the policy authority. Accordingly...

...Trojan horses for example. Conditions can detect specific conditions of data files attached to the **package** .

Actions can interrupt delivery of the **package** , log handling of the **package** , or modify the **package** . Examples of interupting actions include blocking delivery of the **package** outright, blocking the **package** pending review by the policy authority, or delaying delivery of the **package** . Logging actions can include, for example, saving a copy of the **package** , sending a copy of the **package** to a **predetermined recipient** , and notifying a **predetermined** entity (perhaps the sender) of another action taken with respect to the **package** . Modification actions can modify the **package** by changing the subject, the message, **delivery** attributes, post **delivery** attributes, and the attached data files. For example, all attached data files can be removed...

Claim
... method of Claim 2 wherein the one or more actions document the

delivery of the **package** .

6 The method of Claim 5 wherein the one or more actions document the delivery of the **package** by storing a copy of the **package** .

7 The method of Claim 5 wherein the one or more actions document the **delivery** of the **package** by sending a copy of the **package** to a **predetermined** **recipient** .

8 The method of Claim 2 wherein at least a **selected** one of the one or more actions notifies at least one predetermined recipient of one...

...method of Claim 26 wherein the one or more actions document the delivery of the **package** .

30 The method of Claim 29 wherein the one or more actions document the delivery of the **package** by storing a copy of the **package** .

31 The method of Claim 29 wherein the one or more actions document the **delivery** of the **package** by sending a copy of the **package** to a **predetermined** **recipient** .

32 The method of Claim 26 wherein at least a **selected** one of the one or more
I
- 33 actions notifies at least one predeterrained recipient...medium of Claim 50 wherein the one or more
actions document the delivery of the **package** .

Detailed Description

Detailed Description
... time and/or distance required for 25 the vehicle to travel its route. However, the **selected** order is not necessarily convenient for each **recipient** that is to receive delivery of at least one of the **packages** . For example, due to the order of **delivery** **selected** , the vehicle may be scheduled to deliver one of the **packages** between 1:00 p.m. and 2:00 p.m. The **recipient** of this package may not be available to receive **delivery** during this time period. Therefore, the package is usually either left unattended at the place of **delivery** or is not delivered. When the **package** is not delivered, a later **delivery** attempt (often the next day) is attempted.

It would be desirable for a **delivery** system to allow the route of the delivery vehicle (including the order that the vehicle...

  Detailed Description

Detailed Description
... delivery of an item.
A computer-based method and system for coordinating the delivery of **gifts** by receiving **gift** orders, collecting additional delivery information that is not specified 'in the **gift** orders, and delivering **gifts** based on the additional delivery information is also provided. hi one embodiment, the **gift** **delivery** system receives **gift** orders via Web pages provided on the WWW. The **gift** orders **specify** a **gift** that is to be delivered to a **recipient** .

'2o The **recipient** may be identified by information that does not 'include the delivery address of the recipient...as a voice telephone call, postal mail, facsimile, or electronic mail. In step 1102, the **gift** **delivery** system attempts
to contact the **recipient** of the **gift** . The **gift** order may **specify** contact
information for the **recipient** , such as an electronic mail address or a telephone number of the recipient. Based on...that accesses a gift database 1204. The
gift giver uses the Web page provided to **select** which gift should be sent to the recipient. In addition, the gift giver provides inforniation describing the **recipient** . The order entry system then stores the order infortnation in the
order database 1205. The **gift** **delivery** system controls the locating of
additional **delivery** information so that the **gift** can be successfully delivered to the **recipient** . The **gift** **delivery** system retrieves information from the
22
order database and attempts to contact the **recipient** based on the information provided with the **gift** order. If the **recipient** cannot be contacted based on
that information, then the **gift** **delivery** system accesses other database
sources, such as the customer database 1206 and Internet-based databases
...

Detailed Description

Detailed Description
... delivery of the item. It may take as much as several days to coordinate the **delivery** of the item.

In many instances however, unscheduled **delivery** of **packages** is satisfactory for recipients. Many commercial **delivery** systems carry **packages** from a sender to a **recipient** . The **delivery** company receives the **package** and groups it with other **packages** in a **selected** geographic area. A route list is developed so that the packages are delivered in a particular sequence. Various mechanisms are known to **select** and arrange a **delivery** sequence for a route list. The carrier follows the sequential route list and delivers the packages to recipients. For business **delivery** , a clerk typically is available during the day for receiving such unscheduled **delivery** of **packages** . For home **delivery** the carrier may be authorized to leave the item
-3
irrespective of whether a **recipient** is present. In other situations, the carrier leaves the **package** with a neighbor.

Many **delivery** companies offer a service of delivering a **package** by a preselected time. The problem remains, however, that some **packages** will be delivered before others are delivered, before the predetermined time. In circumstances where a...

```

Abstract (Basic):
... The method involves receiving a **selection** from a Giver computer of a pre-selected **gift** . Information is provided about the pre- selected **gift** to the Recipient computer. A Recipient **selection** is received from the **Recipient** computer. The pre- **selected** **gift** is provided to the **Recipient** if the first **Recipient** **selection** indicates **delivery** of the **gift** . A database is accessed for information about a different **gift** if requested by the first **Recipient** **selection** . The information about the different **gift** is sent to the recipient computer...

```
...A second Recipient  selection  is received from the  Recipient
    computer. The pre- selected   gift  is provided to the  Recipient  if
    the second  Recipient   selection  indicates  delivery  of the pre-
    selected   gift . Otherwise a chosen different  gift  is provided to
    the  Recipient  if his  selection  indicates  delivery  of the chosen
    alternative  gift .

Summary of the Invention:

...the order form to prepare a set of transaction control slips also referred to as **delivery** slips. Each set of transaction control slips is used by the department store in order to locate the **gift** **selected** by the customer, wrap the **gift** , deliver the **gift** to a **delivery** station, deliver the **gift** from the **delivery** station to the ultimate destination, and receive a signed receipt from the ultimate **recipient** . The signed receipt is returned to the department store to complete billing and record keeping...

...by the carrier.

All carriers deliver packages. The critical question is what happens to the package if no one is home. Many individuals do not provide a weather proof delivery area. Weather protection is one reason to use a return receipt which the recipient must sign before receiving the package or select a carrier's option that requires the recipient sign for a package.

Each carrier has...
